Sent via email:

[redacted]@[redacted]

Dear [redacted]:

Re: You are entitled to part of the information you requested - 2021-[redacted]-HEA

The Department of Health and Wellness received your application for access to information under the *Freedom of Information and Protection of Privacy Act* (the Act) on June 22, 2021.

Thank you to a concerned Nova Scotia resident who took the time to contact the NS Department of Health and Wellness regarding masks in schools. The same person also went through the efforts to contact the Government asking for data about ICU hospitalizations and capacity going back to 2015. This earlier result is well worth a read.

Note: when scrubbing details, a few pages at the end turned out a bit wonky. Hopefully, that doesn't detract from the overall information.

> The Department of Health and Wellness received your application for access to information under the Freedom of Information and Protection of Privacy Act (the Act) on June 22, 2021.
> .
> In your application, you ***requested a copy of the following records***:
> .
> ***All scientific data, correspondence, studies, final briefing notes, risk-benefit analysis that justify and or support the government's actions and decision-making that masking children*** in schools is necessary to reduce the spread of COVID-19 that are held by Dr. Strang Chief Medical Officer of Health. (Date Range for Record Search: From 02/29/2020 To 06/21/2021)

This is a very reasonable request. If young children are going to be forced (or coerced) into wearing masks for 4 or 6 hours per day, then we need to see some justification for this. For all the rambling about following the science, let's see some actual science.

> You are entitled to part of the records requested. However, ***we have removed some of the information*** from the records according to subsection 5(2) of the Act. The severed information is exempt from disclosure under the Act for the following reasons:
> • Section 14(1): The head of a public body may refuse to disclose to an applicant ***information that would reveal advice, recommendations or draft regulations developed by or for a public body***.
> • Section 20(1): The head of a public body shall refuse to disclose personal information to an applicant if the disclosure ***would be an unreasonable invasion of a third party's personal privacy***.

The Province is redacting part of the information, claiming that it would force them to reveal regulations currently being drafted. They also allege some 3rd party invasion of privacy. It's scant on details, so there's really no way to verify this.

> We are refusing access to a portion of the records for the following reason pursuant to subsection 4(2) of the Act:
> • The Act does not apply to the following kinds of information ***in the custody or control of a public body***: published information, material available for purchase and material that is a matter of public record.

As an additional ground, no information can be released, since apparently it's already in the public domain. Now, there are links provided on the next page, but this doesn't really help narrow down where exactly that information is.

> Information that is not responsive to the scope of your requests has been removed from the records package.

Dude, you haven't provided any information. Does the Chief Medical Officer of Health in Nova Scotia not have any records related to the health of children in schools, and how masks would impact them?

> Nova Scotia's Covid -19 response actions have been ***based on national and international guidance from the Public Health Agency of Canada (PHAC) and the World Health Organization (WHO)***. As the leading agencies for pandemic response nationally and internationally, both PHAC and WHO are continuously reviewing the evolving scientific evidence regarding COVID-19 and the effectiveness of various measures. These reviews are used to form their guidance, position statements, and other documents all of which are in the public domain.

This is the typical self-congratulations, that doesn't really answer the question being asked. Now, there are another 10 pages attached, mostly redacted. The information provided is pretty useless. Now, if there truly was a scientific and medical basis for the decision to push masks on the public (and especially on kids) why not share it openly?

There has to be far more information that the pages (even the redacted ones) provided. This is a major decision, and not something that can be done on a whim. What are they really hiding?

And since we're on FOIs, go visit Fluoride Free Peel. Amazing work done there by Christine Massey to expose the scam of this so-called virus. It's never been isolated, anywhere, ever, by anyone in the world.

Need to sun an administrative procedure on the Chief Medical Health Officer now that you have this reply from them.

Having done many FOIs in the last decade, I can tell you the problem is that you cannot ask questions, you can only request records.

So, the request should be worded: This is a request for all records for the period… regarding…..

The purpose of FOIs is not to answer questions, only to provide requested records.

FREEDOM OF INFORMATION. Think about it. The request was for the information held by Dr. Strang…that masking our children is justified. One would THINK that if he is masking our kids – as young as TWO YEARS OLD…he has the data in his office to justify this. Obviously NOT.

He wouldn't need it since he has a mask exemption for his own child…

yes, sounds like question period in parliament. arbitrary decisions, proxy governing entities, supra national entities and organizations, WHO – a private corporation, area all illegal forms of government forbidden with the 1867 British North America Act, and

also contrary to real scientific evidence of what masks do, in addition Made in china, incuding the graphene, nanotech particles in masks, with the evident censor me, self censoring agenda of people. this also represents genocide, war, zero justice and accountability with insolence, arrogance and contempt for real law and people, in addition to personal individual health sovereignty.

the American Justice Watch is successful in litigation, that is lawsuit for freedom of information….class action, multiple class action, personally and collectively….

"They also allege some 3rd party invasion of privacy." try collusion, collaborateurs, acts of aggression, wars of aggression, enemies foreign and domestic, enemy combatants, genocide maniacs, sociopaths, psychopaths, treason, race traitors, allegiance to a foreign criminal agency, satan worshippers, child ritual sacrifice and murder, mass murderers, serial killers, Bill Gates, Bill and Melinda Gates foundation etc etc aka, receiving money from known terrorists and criminals etc etc puppets and lovers, paedophile and proxy paedophile and other related homo-fascists totalitarian decrees

if that is valid, so is refusing to confirm or deny vaccination status,

try peace, order and good government, try section 7;
not bullshit, lies, deception, misinformation and genocide…

it is not a pandemic, it is a bio-weapon genocide…

it is not a vaccine, it is a bio-weapon

the test is a bio-weapon

the mask is a bio-weapon

biological warfare is treason and high treason

the government is engaged in terrorism, genocide, war, sickness and death

see: presscore.ca & stateofthenation.co, mercola.com

the enemy owns, controls, votes, edits, and censors the majority of mainstream media

Funny that Dr Strang has a mask exemption for his own child.. ALL children need to breathe without restrictions!
